## Be prepared

Once you have received your new shower, you will need to be prepared.

You will need to read:

• The installation manual

• The user manual

• The warranty card

• The safety instructions

• The technical specifications

• The installation instructions

• The maintenance instructions

## Asbestos safety check

Before you start the installation, you should check for asbestos. Asbestos is a naturally occurring mineral that can be found in some buildings. It is a known carcinogen and can cause lung cancer and other respiratory diseases. If you suspect there is asbestos in your building, you should contact a professional asbestos abatement company. They will test the building for asbestos and, if necessary, remove it. This process can be time-consuming and expensive, so it is important to check for asbestos before you start the installation.

## Will there be much inconvenience?

We understand that the installation of your new shower may cause some inconvenience. However, we have designed our showers to be easy to install and use. The installation process is simple and can be completed in a few hours. Once installed, the shower is easy to use and will provide you with a comfortable and relaxing shower experience.

The installation of your new shower will not cause any damage to your existing bathroom. We will provide you with a shower rail and curtain, so you do not need to purchase any additional accessories.

Your new shower comes with a shower rail and curtain, we are giving these to you. It will be your responsibility to maintain in the future.
