LOOKING AFTER YOURSELF AND
OTHERS DURING HOT
WEATHER – THE LATEST ADVICE

7 eat can be harmful to our health Key messages

- 1 In one hot spell in August 2003 in England, deaths in those aged 75 and over rose by 60%, with approximately 2000 total extra deaths than would normally be expected.
- 2 Those with heart, respiratory and serious health problems are more at risk and the heat can make these conditions worse. Babies and young children are also especially at risk.
- 3 Many prescription medicines can reduce your tolerance of heat. You should keep taking your medicines, but take extra care to keep cool.
- 4 Danger symptoms to watch out for in hot weather include: feeling faint and dizzy, short of breath, vomiting or increasing confusion.
- 5 Take immediate action if danger symptoms of heatstroke are present:
 - Cool down as quickly as possible (see the advice on page 3).
 - Do not take aspirin or paracetamol – this can make you worse. Please note: do carry on taking all other prescribed medicines.
 - Seek further advice from NHS Direct, a doctor, or ring 999 if the person has collapsed.

heatwave⁺

Remember heatstroke can kill. It can even be
sudden and lead to unconsciousness. If you
suspect someone has heatstroke call immediately.

7.1 Helping others

- If anyone you know is likely to be at risk during a heatwave (see the list on page 4), help them get the advice and support they need. Older people living on their own should be visited daily to check they are OK.

7.2 While waiting for the ambulance

- If possible, move the person somewhere cooler.
- Increase ventilation by opening windows or using a fan.
- Cool them down as quickly as possible by loosening their clothes, sprinkling them with cold water or wrapping them in a damp sheet.
- If they are conscious, give them water or fruit juice to drink.
- Do not give them aspirin or paracetamol.

If you want more information about hot weather and
your health please visit www.nhs.uk. If you are concerned
about your health or someone you care for please
contact • 7 • direct on  www.nhs.uk or your
local pharmacist or .
